### **DETAILED ACTION**

This is the fourth Office Action **final** for serial number 10/735,547, Method And Apparatus For Displaying A Wine Cork, filed on December 12, 2003.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 1,119,934 to Donnelly in view of U.S. Patent No. 6,022,816 to Dewar.

Donnelly '934 discloses a method of displaying a used wine cork while simultaneously preventing residue on the cork from staining a surface on which the holder rests (necessarily taught by the drawing; the plug of the wine cork (7) is seated in the bowl of the pipe (6)). The pipe necessarily displays the cork as well as allowing the cork to function as a fireproof material and allow ease of cleaning of the pipe. The pipe bowl has a base (figs. 1-2) and at least two sidewalls (shown in fig. 1 as the cutout of the bowl). Although, Donnelly '934 necessarily teach the dimensions of length and spacing since wine cork are standardized. Attention is directed to Dewar '816, which teaches a wine cork is standardized with 24 to 55 mm length (.945 to 2.16 inches) and 21 to 23mm (.827 to .905 inch) diameter. Accordingly, the pipe accommodates a

standardized wine cork and therefore in order for the cork to function in its intended use by providing a holder and placing a cork into the holder, the pipe bowl of Donnelly '934 necessarily has a length of between .25 and 4.0 inches and .5 and 1.5 inches diameter as taught by Dewar '816.

The rest of the claims recite structure limitations of a wine cork display holder in general, which have no bearing on the method of placing the cork into the holder.

### ***Response to Arguments***

Applicant's arguments filed December 3, 2007 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
